Evening reset

[] Unload - Empty every child's bag completely at its fixed station.

[] Inspect - Find missing, wet or apparently damaged items while the rental shop and ski school may still be reachable.

[] Dry - Open bags and move gloves, socks, neckwear, liners and insoles to the permitted drying place.

[] Charge - Charge the devices you will actually need with the correct cables.

[] Refill - Replace confirmed snacks, drinks, tissues and other used everyday supplies.

[] Repack - Return dry items to the correct child's slope kit.

[] Recount - Count bags, helmets, goggles, boots and rental pieces. Move unresolved items back to the family board.

Journey-home reconciliation

[] Match every rental piece to its person, reference and return point

[] Collect liners, insoles, gloves and socks from drying areas

[] Check every used socket for cables and devices

[] Count child and adult bags by their marker

[] Resolve lost-property or provider cases while you are still there

[] Pack wet items separately so they can be opened on arrival

[] Put documents, keys and payment methods in the assigned bag

[] Unpack and dry wet equipment immediately after arriving home
